Beside above concentrations, we can also provide customised dye contents as well.

Applications

Lake Colours are dispersible in Vegetable Oil and can be mixed with fats, oils, etc. They can also be dispersed in suspension propylene glycol or sucrose (water or sugar). Because of their good dispersion properties, a diverse range of products can be coloured with these products. We offer them in different concentrations like **15–22%, 23–30%, 31–38%, 40–45%.**

Ink Colours

We have developed a diverse range of salt free colours for inkjet industry.

Acid Yellow 23

Acid Blue 9

Food Brown
