

BEVS is a leading manufacturer that specializes in coatings, ink, paint, resin testing instruments and laboratory whole solution. Our testing instruments are made within the highest standards and combined with today's most advanced technology.

Moreover, we are also the only one in the world to research and study on the technology of intelligent robotic testing and inspection system to cater to the needs of the competitive and technological industry.

BEVS technology keeps empowering industries such as coatings, inks, rubber, plastics, new energy, and new materials, and continuously plays an important role in providing value-added services to worldwide users.

We take great honor to participate in this significant occasion. Warmly welcome to visit our booth at A50.

BEVS will be the best partner with you and provide the whole solution of testing inspection and laboratory instruments.
